FOR YOUR INFORMATION

WHAT'S HAPPENING AT THE JETTY?

- The Corps of Engineers' North Jetty at the Mouth of the Columbia River is severely damaged and in danger of developing a hole in the jetty that could impact ship navigation.
- About 70,000 tons of stone (about the weight of 15,000 African elephants!) is required to repair the most severely damaged sections of the North Jetty.
- The average jetty stone weighs about 10-tons.
- The Corps awarded a contract in April 2005 for \$4.9 million to repair the jetty.
- Repair work to be completed by November 2005.
